### ***Reasons for Allowance***

The following is an examiner's statement of reasons for allowance:

This invention relates to a process for the producing enantiomerically pure etodolic acid. The process comprises: the resolution of a racemic mixture of etodolic acid; the racemization of the etodolic acid remaining in the mother liquors in the presence of  $\text{SnCl}_4$ ; and the resolution of the racemic mixture thus obtained. The closest prior art of record is US Patent No. 4,604,469 to Demerson et al. The difference between the prior art and the instant claims is in step of the process of this application in which the etodolic acid remaining in the mother liquors is racemized and recycled into the process. The prior art also fail to teach or suggest the instant processes of this application.
